

Rim Off is a premium liquid formula for mining tires. When added to a tire's air chamber, Rim Off protects tires and eliminates wheel/rim loss from scale and pitting, while improving air retention through its sealing qualities. Labor costs are greatly reduced as tire-dismounting time is decreased. Safety is one of the main contributions to our customers. Rim Off not only reduces tire failures, but also aids in the prompt identification of tire cuts and wheel/rim cracks, and keeps tires running cooler than similar tires without the benefit of our product. Rim Off is made from eco friendly non-toxic and biodegradable chemicals.

5 Gallon Part# 640MTRC

- Protects tire casing from degrading
- Protects tires and eliminates wheel/rim loss from scale and pitting
- Improves air retention by sealing natural liner porosity, bead and vent hole leakage
- Prevents cracking and blistering of inner liners
- Improves the seal over buffed areas
- Reduces heat buildup in tires
- Eliminates the need for rim clean up and painting
- Increases more Retreads per casing
- Decreases labor time for tire dismounting
- Reduces labor time for air checks
- Excellent leak detector that safely identifies crack in the rim base
- Regular formula: Operates between -4°F to 225°F (-20°C to 107.2°C)
- Winter formula: Operates between -35°F to 270°F (-37°C to 132°C)
- Arctic formula: Operates between -58°F to 370°F (-50°C to 188°C)
- Added safety for recapped tires
- Non-Toxic
- Non-Flammable
- Biodegradable
- Does not create toxic gases in the tire chamber
- Does not freeze or crystallize
- OPTIONAL...CAN BE USED AS A LIQUID TIRE BALANCE
