Stallion Sahara is a high and slow speed tire pressure management solution designed for commercial vehicles, motorcycles and industrial equipment tires. Sahara will self balance tires, protect the tire casing from heat and oxidation damage, seal bead/rim leaks and self repair punctures up to 1/2 inch in diameter. Sahara is the only high-speed gel formula with the highest operating temperature.

- Balances tire and wheel assembly
- Stops air loss and retains correct tire pressure by sealing the entire casing from normal casing porosity
- Continually self-seals punctures up to 1/2" (1.2 cm) in diameter
- Protects tire casing from heat and oxidation damage
- Operates between -58°F to 370°F (-50°C to 188°C)
- Stops Bead/Rim/O-ring and vent leaks
- Added safety for used and recapped tires
- Dissipates tire chamber heat so that tires run cooler
- Does not pool to the bottom or block the valve system
- Does not interfere with Retreading. Will not cause chamber fires in a retread plant. Test results available upon request
- Approved for use with TPMS
- Helps retain casing integrity
- Washes out easily with water
- Non-Hazardous
- Non-Flammable
- Biodegradable
- Non-Toxic
- DOES NOT FREEZE
